01 Experience

Oct. 2023 – Current

Bayer / UX Designer (Pàu consultant)

At Bayer, I focus on UX design and front-end development, shaping internal applications that translate complex business processes into clear, intuitive user experiences. I work closely with stakeholders to capture requirements, structure user flows, and build wireframes and prototypes that ensure clarity and consistency.

Aug. 2021 – Feb. 2023

Present Online / Freelance Web Developer/Designer

I founded Present Online during my studies to turn my newly acquired web design and development skills into real-world experience. My focus was on building clean, user-friendly websites, while also exploring entrepreneurship.

Oct. 2022 – Sept. 2023

Upthrust / Web Developer/Designer

At Upthrust's Digital Product Studio, I collaborated with our design/development team and client stakeholders to deliver in-house projects for SMEs and corporates, contributing to UX/UI design and front-end development for clients such as MyWay, Toyota, and Lexus.

Dec. 2021 – Jan. 2023

KdG Hogeschool / Peer Tutor JavaScript & Web Developer

As a temporary teaching assistant, I helped first-year students grasp the basics of JavaScript, focusing on syntax, JavaScript fundamentals, variables and DOM. Next to that, I developed websites and an appointment tool for KdG Hogeschool's FabLab and Biolab, enhancing their digital presence and efficiency.

02 Skills

Wireframing | Prototyping | Accessibility | User research | Communication | Presenting |
Stakeholder management | Design systems | Component libraries | Atomic design | Scrum

03 Education

KdG Karel de Grote
Hogeschool

2019 – 2022 | Bachelor / Multimedia & Creative Technologies

Completed Multimedia & Creative Technology at KdG Hoboken, excelling in web development, web design, SEO (technical), and UX/UI. (Grade: Great Distinction)
